

## GW1-12G(D)

### Scope use and feature

GW1-12G(D) series outdoor high voltage isolator is suitable for outdoor 12kV distribution line under condition of with voltage but no load. With CS□ type manual operation device, it can prevent closing malfunction of live earthed line. No need to put another earthing line to the distribution line for operators. Pollution-proof type isolator can satisfy customer in heavy polluted region. It's shed has self-cleaning characteristic during operation.

### Environment of application

1. Altitude above sea level:  $\leq 2000\text{m}$
2. Temperature:  $-40\sim 40\text{ }^{\circ}\text{C}$  with wind speed  $\leq 35\text{m/s}$
3. Earthquake intensity  $\leq 8$  degrees
4. Working location shall be free from frequent violent vibration
5. Installation site of ordinary type isolator should be kept away from gas, smoke chemical deposition, salt-spray fog, dust and other explosive and corrosive matters that affect seriously insulation and conduction capability of the isolator.
6. Pollution-proof type isolator is applicable to severe polluted region. However, there shouldn't be any explosive matters and matters that causing fires.
